

# Sprint 1 Report

Truck-d

Team: Julio Hurtado, Mathew Scolari, Robert Mushkot, David Orellana, Mamon Alsalihi  
Revision Date: 10/20/19

## **Actions to stop doing:**

The group is satisfied with the current work process. All of the tasks assigned during the sprint were completed and each member was able to support one another if a problem arose. The team had good communication, each member always being available for questions. Members were not afraid to ask questions to one another.

## **Actions to start doing:**

The team would like to be more consistent with standup progress updates in Slack. Although progress on the project was not made every day, more consistent updates would help the team be more accountable and give a better idea of what was accomplished.

## **Actions to keep doing:**

The group was successful at completing all assigned tasks. If any member had issues with a task, someone from the group was able to help them complete the task. If any member had trouble understanding a concept another member was available to answer questions.

## **Work completed/not completed:**

User Story: As a customer or a vendor, I want a landing page to choose the experience I would like to continue with on the site

We completed the user story by doing the tasks described in the Sprint 1 plan. We set up the basic functionality for the UI along with the required libraries, server setup, and landing page. We finished all the required tasks and no one is falling behind. The team created a Github page which gives our project a solid foundation.

The team would like to put more structure to the front end of the customer & vendor pages, create the store state, and the AWS service to host the database.

## **Work completion rate:**

- Total number of user stories: 1
- Total number of estimated ideal work hours completed: 24
- Total number of days during the prior sprint: 12
- User stories per day: 1/12
- Ideal work hours per day: 2

**Burnup Chart:**
