Sprint 3 Report

Truck-d

Team: Julio Hurtado, Mathew Scolari, Robert Mushkot, David Orellana, Mamon Alsalihy

Revision Date: 11/17/19

Actions to stop doing:

      The team underestimated the amount of time it would take to implement all the functionality required for this sprint. This sprint had significantly more work than the previous two which we did not expect. We would like to stop underestimating as much as we did in this sprint.

Actions to start doing:

      The team would like to start earlier on their initial tasks and be more consistent with standup posts on Slack. The team would like to plan how long each user story will take better so we can accurately determine the amount of time the user stories will take.

Actions to keep doing:

      Make sure to keep communication up because we need to communicate and coordinate with one another about different tasks. Also making sure that teammates' questions are being answered.

Work completed/not completed:
- Completed:
    - Profile Editor: UI and backend calls are almost finished. State is completely finished.
    - MenuView: UI and state are mostly finished. Backend calls are complete
- Not Completed
    - As a vendor, I want a profile editor to edit information about my food truck such as location, hours, etc (5 Points)
    - As a customer, I want to add menu items to my cart so I can buy food. (8 Points)

Work completion rate:
- Total number of user stories: 0
- Total number of estimated ideal work hours completed: 33
- Total number of days during the prior sprint: 14
- User stories per day: 0
- Ideal work hours per day: 2
